Searching For Components?

ecsn recommend the following trusted websites:

NetCOMPONENTS www.netcomponents.com

Is a market leader in sourcing services for the worldwide electronic components industry and is the world's premier destination for the sourcing and procurement of electronic components, connecting members (buyers) and suppliers (sellers) in a direct and vendor-neutral environment.

ecia Authorized <https://www.eciaauthorized.com/en>

The ECIAauthorized.com site was created by ECIA, in collaboration with its members, to support the authorized electronic components industry by giving users access to aggregated price and availability data for genuine parts from only authorized sources.

While other inventory aggregation sites may include data from sources that are not authorized by the manufacturer, ECIA works extensively on an ongoing basis to verify that price and availability data displayed on ECIAauthorized.com is only for products for which the distributors are authorized/franchised. That is why ECIAauthorized.com is the trusted source for searching the authorized channel for the electronic components you need.

ECIAauthorized.com was created by ECIA and its members as a free service to purchasing professionals, design engineers and anyone in need of electronic components price and availability information from franchised distributors. All the distributors that participate on the site are required to be members of ECIA.

The International Distribution of Electronics Association (IDEA) www.ideaelectronics.com

Founded in 1984 IDEA is an international association of local electronic components industry associations from many world countries who actively collaborate and share best industry practice and knowledge. We work closely on international standards, legislation and regulation offering our members advice on what is required to ensure they are fully compliant. IDEA seeks to harmonise standards and positively promote the electronic components industry across all media platforms.
